France – Norway digital competences and solutions transforming the energy industry

Rapport:

The event was held in cooperation with the French-Norwegian Chamber of Commerce and Evolen, in Paris, on the 31st of May. The objective was to unite leaders of Norwegian and French companies, clients and contractors alike, for dialog and presentations on the topic of digital solutions in the energy industry. The theme is highly relevant in today's market, and development in this field is moving fast. It is therefore important to facilitate such a meeting place to ensure the competitiveness of Norwegian, as well as French businesses.

The event was opened by Norwegian Deputy Minister of Petroleum, Mrs. Ingvil Smines Tybring-Gjedde, and Norway's ambassador to France, Mr. Rolf Einar Fife, and had close to 150 total attendees. Four leading energy companies, two Norwegian and two French, held keynote presentations, before 17 speakers from Norwegian and French suppliers spoke about their services and solutions.

The feedback for this event has been very good, and the objective of shining light on the challenges and opportunities of digitalization, and create dialog between companies in our two nations was met. Norwegian Energy Partners have had continued dialog with Evolen, and the parties have agreed to arrange a similar event, on a new topic, next year.
